

Frequently Asked Questions for Residential Driveway Approach

What is the procedure for constructing a new residential driveway approach?

A site investigation is required for the new residential driveway approach. An application can be submitted to the Permit Counter in City Hall. The City's Building & Safety Inspector investigates the site within 72 hours of the site investigation inspection request being input into Online Business Center (OBC) by a Development Specialist Technician (DST) and prepares a recommendation for the driveway approach which he inputs into OBC. The applicant can then apply for a permit at the Permit Center in City Hall for construction of a new driveway approach in accordance with the inspector's recommendations.

What is the width of the driveway approach?

The residential driveway approach shall be constructed in accordance with City's [Standard Detail Drawing BH 101](#) for Residential driveway approach.

Who can construct the driveway approach?

A California Licensed contractor Class A (General Engineering) or Class C-8 (concrete Contractor) is required to complete the work.

When do I call for an inspection?

You can call (310-285-1141) for an inspection after issuance of the permit and after the contractor sets the form for the driveway approach. It is required to call the phone number listed on the permit for inspection (310-285-1141), 24 hours in advance.

Can I extend the driveway approach outside of my property line extension?

No, you can only construct the driveway approach within your property. This includes the wings of the driveway approach.

Can I use colored concrete or different type of material for the driveway approach?

No, the driveway approach should only be concrete and should match the color of the sidewalk and curb and gutter.

How much does a public right of way/street use permit cost?
