

The power of working together

CPA Power Response

| An Olivine Community Program

Smart Thermostats & Battery Energy Storage Program Options for Residential Customers

Earn money while helping to create a cleaner environment and healthier communities.

Customers with smart thermostats or battery energy storage systems can receive financial incentives for modifying their energy equipment use during times of peak energy demand between 4-9pm on weekdays.

Program benefits

Earn incentive payments and potentially reduce your monthly energy bill

See your energy savings through the Olivine Community App

Reduce pollution and greenhouse gases

Help reduce strain on the grid during times of peak demand

To be eligible you must:

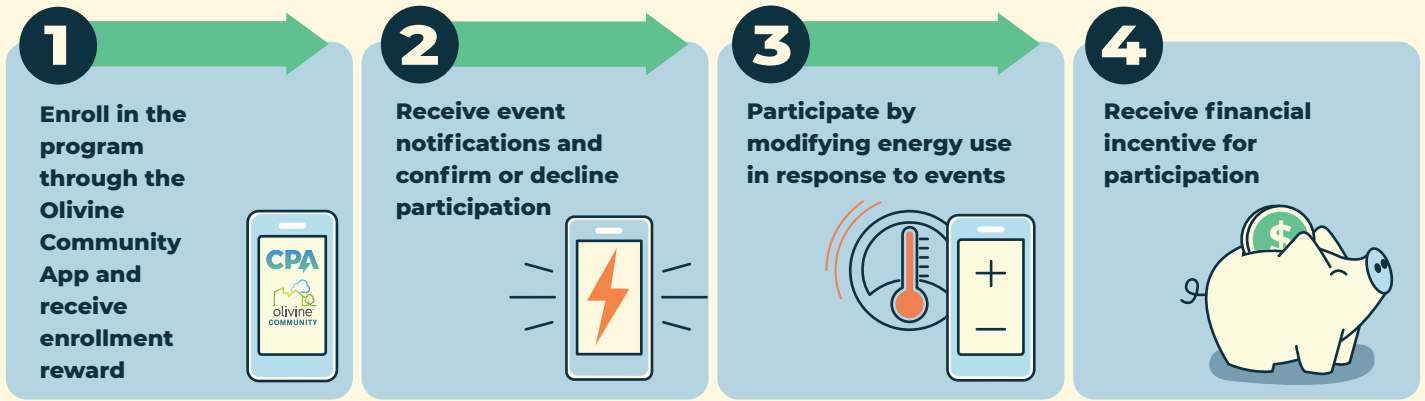

- ☒ Be a Clean Power Alliance residential customer
- ☒ Have a smart thermostat or battery energy storage system connected to the internet
- ☒ Agree to modify your energy usage in response to up to 5 energy savings events per month

Master metered customers and customers enrolled in other third party demand response programs, Medical Baseline Allowance, or SCE's Summer Discount Plan (SDP) are not eligible to enroll in CPA Power Response unless they disenroll from those programs. Rewards and enrollment are limited to one person per household.

Earn \$100 for enrolling and get an additional \$100 yearly participation reward.

Higher incentives available for CARE/FERA customers and customers located in targeted low-income areas.

How does the CPA Power Response program work?

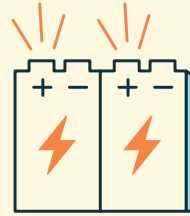

Smart Thermostats

Smart thermostats can enable energy savings by allowing users to remotely control their heating and cooling settings from a computer or a smartphone (e.g. Nest and Ecobee).

- Available to Clean Power Alliance customers with installed smart thermostats from qualified vendors / technology suppliers.
- Olivine, Inc. will connect to your smart thermostat or send instructions through the program app during an event.
- Event participation is flexible but you must participate in at least 50% of the events annually to receive participation incentives.

Don't have a smart thermostat?

Purchase a discounted device through the Southern California Gas Company (SoCalGas) marketplace to start benefitting from the CPA Power Response program.

Battery Energy Storage

Battery energy storage allows energy to be retained and used at a later time.

- Available to Clean Power Alliance customers with existing solar-paired or standalone battery energy storage systems from qualified vendors/ battery management system suppliers.
- Olivine, Inc. will send instructions through the program app or through your battery management provider during an event.
- Event participation is flexible but you must participate in at least 50% of the events annually to receive participation incentives.

*Incentives are limited
- Apply now!*

How do I enroll?

- 1 Visit the CPA Power Response Program website: www.cleanpoweralliance.org/respowerresponse
- 2 Download the Olivine Community app on your computer or smartphone*.
- 3 Set up an account through the Olivine Community app and follow the enrollment steps.

*Option to receive program notifications via text message if you don't have a smartphone
